

Jeremy Scott

Professor Hillerman

GIT 414/514 Fall Session-A 62919 | 76175

06 October 2026

1. Metadata Inventory and Snippet Plan

Page List	Primary User Task	Title Plan	Description Plan	Heading/ Link Check
Home	Introduce users to Jeremy Scott and my programming experience	<title> Jeremy Scott Full – Stack Web Developer </title>	Portfolio Site of programmer Jeremy Scott. Check out my most recent projects!	Main heading: Jeremy Scott Full – Stack Web Developer Two supporting links: 1. /Projects 2. /Contact
About Me	Bio of Jeremy Scott / Self- Portrait	<title> About Me Jeremy Scott </title>	Find out more about full-stack web developer Jeremy Scott's journey into programming and graphic design.	Main heading: About me Two supporting links: 1. /Home 2. /Skills
Projects	Provides users with examples of my web development and graphic design projects, as well as provide users a link to github to explore past projects.	<title> Projects Jeremy Scott </title>	Check out Jeremy Scott's most recent web development and graphic design projects, including a link to past projects as well.	Main heading: Projects Two supporting links: 1. /Home 2. /Skills
Skills	Showcase the programming languages I am familiar with, as well as the graphic design softwares I use	<title> Skills Jeremy Scott </title>	Explore the programming languages and Softwares Jeremy Scott uses to build modern responsive websites.	Main heading: Skills Two supporting links: 1. /Projects 2. /Contact
Contact	Give users a way to reach me for collabs, recruiting or questions	<title> Contact Jeremy Scott </title>	Get in touch with Jeremy Scott to collaborate on a project today!	Main heading: Contact Me Two supporting links: 1. /Home 2. /About_Me

2. Titles and descriptions:

- Revised home page title
 - `<title>Jeremy Scott | Full-Stack Web Developer & Designer Portfolio</title>`
 - Changed it to include a synopsis of what the page is about
 - Will do the same once I create separate pages for (About Me, Skills, Projects, Contact)

3. Semantic headings and crawlable links:

- `<h1>` - Jeremy Scott | Full-Stack Web Developer & Designer
- `<title>` - includes seo info pertaining to what the page is about (web development, graphic design)
- `<h2>` - native html titles for Section titles
- `<h3>` - project cards (graphic design & web development) for semantic hierarchy
- Fragment links (`#top`, `#about`, `#projects`, `#skills`, `#contact`) used to provide in-site navigation instead of just filler `#`'s.

4. Canonical, robots, and sitemap notes:

- ➔ **Canonical (applies now)** - since the site link is published on github, I included a canonical link in the `<head>` section.
- ➔ **Robots (applies now)** - set the robots to index to let Google bots know they can include my site's content in search results to drive traffic to the portfolio site later. Gives permission for crawling.

→ **Sitemap (applies now)** - included a sitemap to help out the google bots find the important bits of the site.

5. Social metadata:

og:title	Jeremy Scott Full-Stack Web Developer & Designer
og:description	“Portfolio of Jeremy Scott, a full-stack web developer and designer creating responsive, accessible websites and visual projects.”
og:url	https://jeremyscott146.github.io/Module-4-Media-and-Typography-Optimization-Build-/#contact
og:type	website
og:image	"https://jeremyscott146.github.io/Module-4-Media-and-Typography-Optimization-Build-/assets/images/self-portrait-1200w.webp"
og:image:alt	Self-portrait of Jeremy Scott wearing glasses and a gray beanie.

6. Structured data:

```
<script type="application/ld+json">

{
  "@context": "https://schema.org",
  "@type": "Person",
  "name": "Jeremy Scott",
  "url": "https://jeremyscott146.github.io/Module-4-Media-and-Typography-Optimization-Build-/",
  "jobTitle": "Full-Stack Web Developer and Designer",
  "description": "Full-stack web developer and designer who builds responsive, accessible websites and visual projects.",
}
```

```

"image":
"https://jeremyscott146.github.io/Module-4-Media-and-Typography-Optimization-Build-/assets/images/self-portrait-1200w.webp",

"sameAs": [

]
}

</script>

```

7. Image discoverability:

Filenames	Alt decisions	Nearby text/ context	Page relevance
images/self-portrait-800w.webp (with 480w/1200w responsive variants)	Informative "Self-portrait of programmer Jeremy Scott wearing glasses and a gray beanie."	Placed at top of home page near the hero text section "Hi, I'm Jeremy Scott" / Also on About Me page	Introduces people to me by showing a self-portrait of me so people can put a face to the name
images/graphic-design-projects.webp	Informative "Collage of Jeremy Scott's recent graphic design projects, including Dreams vs. AI, Chasing the Dead, and Euro Stile 25 poster designs."	Image inside of the "My Projects" section of the home page on the 'Graphic Design Projects' card.	Spices up the graphic design card and gives a showcase of some examples of my work in that category
images/web-development-projects.webp	Informative "Collage of Jeremy Scott's recent web development projects showing responsive website layouts."	Image located inside of the "My Projects" section of the home page on the 'Web Development Projects' card.	Spices up the web development card and gives a showcase of some examples of my work in that category
Tech-stack icons / badges	Decorative alt=""	Located under the "My Skills" section of the home page and on the 'Skills' page as well.	Decorative icons listed on the skills page and home page for visual reference of the technologies im familiar with
Social Media icons	Decorative alt=""	Located in the footer section underneath the copyright txt	decorative/clickable icons for people to navigate to my social pages for networking

9. Ranking-claim limits:

- I will not claim that just by adding a valid JSON-LD my site will receive a higher placement on a google search.
- I will not claim that adding a meta description will guarantee rich results or that my page will somehow be prioritized on a google search.
- I will not claim that adding a robots.txt and sitemap will butter up the google bots to rank my portfolio site higher.

10. AI disclosure:

- I used AI to help me understand the vocabulary (structured data, crawlable links, ranking, canonical, robots, sitemap) and where it all ties into the process.
